

At Our List of Proven Programs

Software Quality Engineering / Testing

Testing, Quality Assurance, and Security Techniques
Unit Testing and System Verification
Ensuring Quality in an Agile Environment
Testing and Quality Assurance for Managers
Root Cause Analysis
Critical Thinker's ToolKit
Software Project Estimating and Scheduling
Essential Skills for the Business Analyst

Business Analysis / Requirements

Implementing and Using a Methodology
Mastering the Requirements Elicitation
Developing Effective Requirements Specifications
Essential Skills for the Business Analyst
The 21st Century Business Analyst
A Universal Approach to Systems Analysis and Design
Mastering Use Case Modeling
A Universal Approach to Systems Analysis
A Universal Approach to Systems Design
Analysis and Design for Managers and End Users
Data Modeling and Warehousing Concepts
Critical Thinker's ToolKit
Applied Critical Thinker's ToolKit: Business Process Analysis
Process Mapping Bootcamp
Object-Oriented Analysis and Design
Mastering UML and Patterns
UML with Rational Rose
Software Project Estimating and Scheduling

Project Management

Essential Skills for Project Managers
Managing IT Projects
Project Sponsorship
Project Time Management
Project Cost Management
Project Quality Management

Programming & Web Technologies

Core Spring 3.x for Java Developers
HTML5 with Javascript and CSS3 for Developers
Advanced jQuery: Creating Modular and Maintainable
HTML5 Rich Applications with jQuery UI, Backbone, and REST
Designing Service Oriented Architectures (SOA)
Developing Applications Using the Java Message Service API
JBoss Drools Business Rules
Drools JBoss Rules 5.0 for Developers
Advanced Struts
Flash for Developers
Flex: Programming the Visual Experience
Microsoft Silverlight 2 for Developers
XML Programming for Developers
Advanced XML
JavaScript Programming
Introduction to Java
Advanced Java Programming
Introduction to Enterprise JavaBeans (EJBs)
Introduction to Servlets and JavaServer Pages
Java Server Faces
Java Server Faces 2 with RichFaces 4
Introduction to Perl Programming
Advanced Perl Programming
Introduction to Python
Developing Web Applications with Ajax
Advanced Ajax Development

Project Risk Management
Advanced Project Management
Building High-Performance Self-Directed Work Teams
Project Management Using MSProject
Agile Projects in Practice
Persuasive Presentations: From Design to Delivery
Troubled Projects: Techniques for Rapid Recovery

SharePoint

SharePoint 2013 Site Collection and Site Administration
Core Solutions of Microsoft SharePoint Server 2013
Developing Microsoft SharePoint Server 2013 Advanced Solutions
SharePoint 2013 for Business Intelligence
SharePoint 2010 Overview (End User)
SharePoint 2010 Overview (IT Pro)
SharePoint 2010 Overview (Developer)
SharePoint 2010 Overview (Designer)
Building Business Solutions with Microsoft SharePoint Designer 2007
Implementing and Administering an Enterprise SharePoint Environment
Microsoft Office SharePoint Server Fundamentals
Developing Solutions with SharePoint Server and InfoPath Forms
Business Application Development and Office SharePoint Server
Application Development with Microsoft Office SharePoint Server

Mobile Application Development

iOS Development
Securing Mobile Applications
Mobile Design Patterns
OpenGL ES Mobile Developers
Cross-Platform Mobile Development with MDE
Introduction to Android Development for Java Programmers
OpenGL/ES Development for Mobile and Embedded Systems

Telecommunications

Fundamentals of Telecommunications
Advanced Telecommunications
Fundamentals of Wireless Communications
Voice over IP (VoIP) Technologies: Issues and Solutions

.NET Technologies

.NET Best Practices and Design Patterns
Fundamentals of Visual Studio 2008
Fundamentals of C# 5 and .NET 4.5
Getting Started with Visual Basic
Going Further with Visual Basic
ASP.NET (with C# or VB)
Building Rich Web Applications with ASP.NET MVC 4'
MS.NET Entity Framework 5 (for .NET 4.5)
Introduction to ADO.NET
Windows Communication Foundation
Windows Workflow Foundation

SQL

SQL Server System Administration
Introduction to Microsoft T-SQL (Writing SQL Queries)

Networking & Data Communications

Networking Fundamentals
Implementing & Supporting Local Area Networks
TCP/IP
Data and Voice Networking over TCP/IP
Network Troubleshooting
Network Security: Challenges and Solutions
Best Practices in Network Security
Wireless Networks: Theory, Practice and Security
High-Speed Networks

Management Skills

Effective Writing Skills
Communication Skills for Technical Professionals
Effecting Organizational Change
Mastering Time Management and Organizational Skills
Understanding and Managing Stress

Our workshops are facilitated by subject matter experts and conducted at your site. Whether your need is a one-time situation, multiple locations or teams, we will work with you to customize any of the above programs to meet your specific objectives -- at no additional charge.

Instructor-led customized on-site training has been our "niche" since 1978. Call us for detailed workshop outlines.
